

# BUSTED OR BAILED

## BUSTED OR BAILED LIVE

**HIGH-SPEED BETS, FAST WINS!**

### GAME IN SHORT

**BUSTED OR BAILED**, a cooperation between Playtech Live and Quickspin Live, is an exhilarating online live gambling game show where players bet on the outcomes of high-speed virtual car chases set against the vibrant backdrop of Los Angeles, California. This game uniquely combines betting dynamics with the intense action of real-life police pursuits, promising non-stop excitement and edge-of-your-seat entertainment.

Players can place their bets on one of three outcomes: the getaway vehicle successfully evading capture, the police car making the arrest, or... a spectacular crash. The live broadcast, captured from a helicopter perspective, ensures every moment is filled with adrenaline and anticipation. The game presenter, styled as a newscaster, enhances the experience with dynamic interaction and commentary, mimicking the urgency and excitement of a real-life breaking news broadcast.

### KEY FEATURES

At the core of Busted or Bailed lies a sophisticated blend of satire and realism. The game cleverly parodies the sensationalist nature of 1990s news broadcasts, a time when the rise of 24-hour news channels sparked a relentless chase for viewership, often at the expense of substantive reporting.

By tapping into this cultural zeitgeist, this game transforms car chases into a form of entertainment where the stakes are high, yet the tone remains light and humorous.

#### SIMPLE AND FAST-PACED

The perfect combination of a simple high/low betting format with the excitement of a high octane car chase.

#### MULTIPLIERS

Multipliers depend on the distance in between the police car and the getaway vehicle, speed ranges and traffic density, with a maximum Multiplier of 10x in case of a crash.

## GAMEPLAY IN BRIEF

### BASIC GAME

Players have three choices to place bets on. They can either bet on the getaway car pulling away from the police and, in some cases, getting away completely, (Bailed) or they can bet on the police gaining on the car and in some cases catching the car (Busted), or a third option is to bet on both cars crashing spectacularly (Crash).

### MULTIPLIERS

Multipliers are directly influenced by the distance between the getaway car and the police car.

The Multiplier on either side of the bet moves up or down depending on the distance between the cop car and the getaway vehicle. After 10 seconds, the round ends with either the distance being closed or moving further away.

### SIDE BETS

All bets on the crash amount to losses unless a crash occurs, in which case only the crash option receives a payout of 10x their bet.

## SPECIAL FEATURES

**Golden Chips** can be implemented on this table.
