

GOLDEN CHIPS

THE BONUS WAY TO EXTRA PLAY!

Reward your players in-game in real time and give games a new dimension!

What are Golden Chips?

Playtech's Golden Chips are a type of bonus – just like Free Spins – awarded to players in Playtech Live Casino games. Each Golden Chip has a specific value and can be used for betting, just like a normal chip.

Golden Chips can be adjusted to fit the staking table for any game and their usage can be restricted to specific tables and time duration.

GOLDEN CHIP

Usage of Golden Chips

Players can earn Golden Chips through various promotions and events, such as:

- Registering for specific events
- Playing a certain number of hands
- Making deposits

Golden Chips can also be credited automatically using the Mystery Bonus and Lucky Cards.

To prevent bonus abuse, adjust the value and maximum amount of Golden Chips that can be placed on the table.

Increase Player Engagement

Golden Chips significantly enhance the gaming experience in Playtech Live Casino games by adding instant value and increasing player engagement. They are a powerful tool for efficiently cross-selling RNG players to Live games or retaining and reactivating existing Live players. Managing Golden Chips through IMS is straightforward.

Golden Chips provide a risk-free opportunity for players to place bets and potentially win real money, with no limitations on withdrawing winnings.

Contact your Playtech CSM or Account Manager for more on Golden Chips and our rapidly growing range of compatible games.
